

C4R

**Carbon
4 Retail
Refrigeration**

Natural Technologies
for Sustainable Retail

The Life-C4R project has received funding from the European Union under grant agreement n° LIFE 17 CCM/IT/000120

www.carbon4retail.eu

Epta's **FTE Full Transcritical Efficiency System**, becomes part of the prestigious **Life C4R – Carbon Retail Refrigeration** project!

It is an **EU-funded initiative**, to define new technologies and standards for natural refrigeration in Retail and contemplated in the **European LIFE17 programme**.

How can
natural
refrigeration
be as simple
as it is **ingenious?**

The revolutionary FTE, CO₂ Full Transcritical Efficiency System

Simple: no complex or sophisticated technical components.

Global: one solution for all markets and store formats, reliable in hot climates and efficient in every season.

Industrial: factory-tested and widely available, using only standard components present on the market.

Reliable: total safety anywhere, better protection of key system components.
